

AP Surface mounting boxes

With IP55 and IP65 rating

These square surface mounting boxes complete the existing range surface mounted boxes. This series of boxes is specifically suitable for outside mounting and/or humid areas. Mounting is quick and simple. The membrane made of flexible plastic ensures a perfect seal.

Product benefits:

- High-quality, halogen-free material
- Clip on cover
- Protection degree IP55 or IP65
- Enhanced space for connections
- Self-sealing membrane entries

AP surface mounted boxes

The AP cable junction box is made of two plastics. The box itself is made of hard plastic material. The membranes on the side and on the bottom are made of a soft, easy-to-perforate plastic. Because of the combination of these materials, the membranes guarantee perfect cable sealing.

The entries are suitable for cables with a diameter up to 17 mm. The boxes are available in different sizes, colors, and protection grades. The compact AP75 in addition to its unique membrane entries also incorporates extendable mounting ears.

Simple mounting

The membrane entries are easy to open. Use a screwdriver or cable to perforate the entry. Pull the cable back to seal the input. The box is closed by clicking the cover on. No screws are necessary.
