

New PMAFIX IP68 Metallic Thread Fittings

NPT thread versions added to two existing fitting ranges

PMAFIX metal NPT thread fittings are now available in both the IP68 fixed thread and IP68 swivel thread ranges addressing NPT thread requirements principally from the North American market.

Suitable for demanding applications on railway vehicles and in machine building.

PMAFIX IP68 fixed thread fittings offer the most robust compact solution. Straight fixed thread fittings are now available with male nickel plated brass termination thread.

PMAFIX IP68 swivel thread fittings allow easy installation and positioning, the termination thread can rotate relative to the fitting body. Straight and 90° curved elbow swivel thread fittings are now available with black anodized aluminium termination thread. For your full flexibility, the swivel thread fittings are also available with female threads. This fitting construction allows fast, easy adaption to provide solutions for almost any kind of thread imaginable.

See reverse for more detailed presentation of the range.

Your key benefits with PMAFIX IP68 metallic NPT thread fittings

- For demanding applications on railway vehicles and in machine building
- Very robust construction
- For high technical requirements
- UL 1696 certification
- EN45545-2 HL3 and NFPA 130 fire safety certification
- IP68 sealing performance

Fixed thread fittings

Fixed Thread Types

Nickel plated brass threads

Thread size	Straight
1/2" NPT	NVNV-N022
1/2" NPT	NVNV-N027
3/4" NPT	NVNV-N043
1" NPT	NVNV-N069
1 - 1/4" NPT	NVNV-N076
1 - 1/2" NPT	NVNV-N088
2" NPT	NVNV-N098

Swivel thread fittings

Swivel Thread Types

Black anodized aluminium thread
