	W42	4200
	W45	4500
	W50	5000

Ordering Information:

Select the complete thirteen digit module part number from the Element, Special and Voltage Tables below.

Example: P1 ZAA DDA 00 W50 is a Dual Diode POW-R-BRIK™ Module with 67mm elements, Rated 985 Ampere, Standard Thermistor and rated at 5000 Volts.

Element Code: DDA

Special Code: 00

00 - Standard Thermistor

XT - No Thermistor

AA-ZZ - Special customer unique specifications.

Note: For detailed application information on thermistor circuit refer to Rectifier/Thyristor Module Data Book, Page 3.

Description:

Powerex Dual Diode POW-R-BRIK™ Modules are designed for medium and high current applications. POW-R-BRIK™ Modules feature an electrically isolated package that simplifies system packaging, installation and cooling. POW-R-BRIK™ Modules utilize Compression Bonded Encapsulation (CBE) mounting and double side cooling of the semiconductor elements. The P1ZAA uses 67mm diodes. Other standard circuit configurations include SCR/SCR, SCR/Diode and Diode/SCR. Additional circuit configurations, e.g. single element, common cathode, common anode, and special element types, e.g. fast switch SCRs, fast recovery diodes are available.

Features:

- High Inrush Current Capability
- Electrically Isolated Packaging
- Internal Copper Contacting
- Gold Element Contacting
- Compression Bonded Elements
- Internal Temperature Sensor
- Two Sided Cooling
- High Thermal Mass for Increased Surge and Overload Capability

Applications:

- DC Motor Controls
- Transportation Systems
- Battery Supplies
- Bridge Circuits
- Resistance Welding Controls
- Mining Power Centers
