

Introducing the Schneider X Series 50A Range Outlet

The new standard for range installation

Easy install and upgrade

The Schneider X Series 50 A 125/250 V Range Outlet offers a faster, simpler way to upgrade your home's electrical devices. With its easy installation, improved connectivity, and an array of new features, the X Series has established a new benchmark for residential wiring applications.

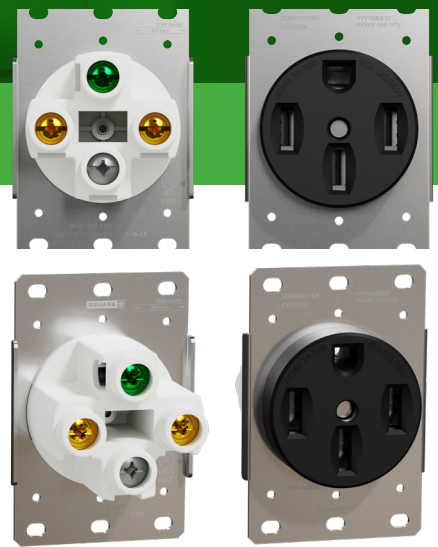

Reliable, customizable, and code compliant

The X Series 14-50 R 125/250 V Flush Mount NEMA Dryer Outlet, 50 Amp (SQR46501BK) has a 15 A current rating and 120 Vac operational voltage. The unit supplies power through two outlet sockets, each containing two poles and a ground, push-in and screw termination. A matching mount box can be recessed into the surface of the wall for flush-mounted installation. A black frame and discrete black shutters protect the receptacle from tampering.

Some of the range outlet's best features include:

- Terminals feature pressure plates to protect wires
- Heavy gauge steel mounting strap ideal for corrosion resistance
- Individual packaging
- Fits in either 1 or 2 gang boxes

The X Series' self-grounding feature eliminates the need for a ground screw, thanks to a brass ground contact that provides ground retention to metal boxes. The device has a width of 2.52 in (64 mm), a height of 3.74 in (95 mm) and a depth of 2.24 in (57 mm). Every X Series unit is cULus certified and satisfies NEMA 14-50R and UL 498 standards.
