Pilot air control valve with spring return spool

**SY-X310 Series**

# Pilot air control valve with spring return spool SY-X310 Series

- ▶ **We focus on machinery safety as a key part of our product development strategy. We have just developed a new version of our SY valve that will help you to satisfy your machine safety system requirements.**

## Main Features

- ▶ **A pilot air control valve with spring return – The concept**

The SY-X310 version controls the pilot air of manifold zones. The safe position is the spring-actuated position.

- ▶ **Validated according to ISO 13849-2**

This product is capable of meeting the relevant basic and well-tried safety principles. Please request our validation document for the details.

- ▶ **SISTEMA library is available**

SY safety valves data are integrated into SISTEMA free software tool. Download it from our website and be ready to build your safety function.

- ▶ **Still an option of our SY, the all-purpose valve**

Benefit from the high versatility this series gives you and create your own configuration, tailored to your needs.

## Applications

Controlling the Pilot air of valve manifold. Thus, it is required to equip the manifold with external pilot air valve. For achieving a diagnostic coverage, SMC recommends to use a suitable pressure detection switch:

- SY5000: F08-2000-M12-M
- SY7000: F08-7000-M12-M
