

Custom design for customer success

Advanced controls and software

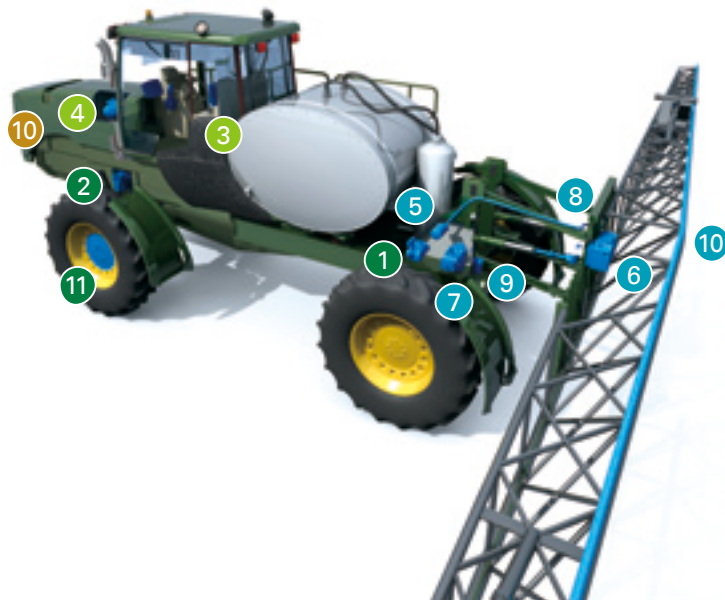

Eaton offers electronic controls, EFX software, and CANbus smart switches for ease of use and precise control, while the Eaton ACE Team develops custom applications for more productive machine operations—helping product managers and design engineers increase sprayer productivity, resulting in higher platform sales volume and greater market share.

EATON

Powering Business Worldwide

Celebrating
100 YEARS
Ideals that Endure

Increase platform sales volume and market share

Application area

- Propulsion
- Vehicle Management
- Engine Solutions
- Spraying

Eaton is in the details

1. Closed Circuit Propulsion Pump
2. Propulsion Motor
3. Electronic Controls (display, controllers, joystick)
4. Steering Control Unit, GPS
5. Open Circuit Gear Pump
6. Control Valves
7. Open Circuit Piston Pump
8. Fluid Conveyance, Hydraulic
9. Filtration
10. Fluid Conveyance, Industrial
11. Planetary Final Drive

Your success is our goal

When they choose new machinery, agricultural equipment customers look for features that will make their operations more profitable. Manufacturers who anticipate and incorporate those features gain competitive advantages, increasing their platform sales volume and market share.

Components and systems from Eaton help manufacturers design and build sprayers that deliver productive features and reliable performance.

Vehicle control system

The Eaton Vehicle Control System ensures precise control for all functions such as propulsion, steering, and conveyance to increase machine productivity and operator comfort.

ACE capability

Our Application and Commercial Engineering (ACE) team members have expert knowledge of platform design and can help manufacturers design optimized hydraulic systems.

Optimized hydraulic system

Eaton offers an optimized hydraulic system that includes components from across our broad product line, selected to deliver peak performance for specific applications.

Hose and fittings

Hose and fittings from Eaton offer flexibility, abrasion resistance, high pressure capability, and protection against leaks to reduce manufacturing times and maximize machine uptime.

Electronic controls and software

Our F(x) software and electronics portfolio gives customers complete control to program system electronics for their specific application needs.

CANbus switches

Eaton offers reliable switches and indicators that can use standard or custom graphics.
